

Health Panels Report

Patient Information

Name	Patient ID	Weight
Jordan Mercer	SYN-JM-742	80.9 kg
Date of Birth	Sex	Collection
1984-02-16 (42 years)	Male	Fasting blood; spot urine

Care context: Type 2 diabetes. Lifestyle management. No known diabetes-related complications.

Summary

Glucose, HbA1c and several lipid markers show modest improvement since the previous panel on 2026-07-04. Total cholesterol is now within the listed reference interval. Glucose, HbA1c, ApoB, LDL cholesterol and non-HDL cholesterol remain above their reference intervals. Most other repeated markers remain broadly stable.

Additional testing includes vitamin D, vitamin B12, TSH and a urine albumin/creatinine ratio. No prior results for these four markers are available in this health history.

Results Above Range

Biomarker	About	Reference Range	Current Result 2026-10-04
ApoB Above range	Reflects the number of circulating cholesterol-carrying particles associated with cardiovascular risk.	0 - 89 mg/dL	91 mg/dL
Glucose Above range	Fasting plasma glucose, a measure of blood sugar at collection.	65 - 99 mg/dL	126 mg/dL
HbA1c Above range	Reflects average blood glucose over the preceding months.	0 - 5.6 %	6.5 %
LDL-Cholesterol (calculated) Above range	Calculated LDL cholesterol, interpreted alongside the rest of the lipid panel.	0 - 99 mg/dL	117 mg/dL
Non-HDL Cholesterol (calculated) Above range	Total cholesterol minus HDL. Represents cholesterol in non-HDL particles.	0 - 129 mg/dL	144 mg/dL

Health Panels Report

Jordan Mercer / Patient ID SYN-JM-742

Biomarker	About	Reference Range	Current Result
2026-10-04			
Absolute Basophils In range	The absolute number of basophils in the blood sample.	0 - 200 cells/mcL	34 cells/mcL
Absolute Eosinophils In range	The absolute number of eosinophils in the blood sample.	15 - 500 cells/mcL	171 cells/mcL
Absolute Lymphocytes In range	The absolute number of lymphocytes in the blood sample.	850 - 3900 cells/mcL	1881 cells/mcL
Absolute Monocytes In range	The absolute number of monocytes in the blood sample.	200 - 950 cells/mcL	399 cells/mcL
Absolute Neutrophils In range	The absolute number of neutrophils in the blood sample.	1500 - 7800 cells/mcL	3215 cells/mcL
Alanine aminotransferase (ALT) In range	A liver-associated enzyme measured in the metabolic panel.	9 - 46 U/L	24 U/L
Albumin In range	A blood protein involved in fluid balance and transport.	3.6 - 5.1 g/dL	4.5 g/dL
Albumin/Globulin Ratio (calculated) In range	Albumin divided by the calculated globulin concentration.	1 - 2.5 ratio	1.7 ratio
Alkaline phosphatase (ALP) In range	An enzyme associated with the liver, bile ducts and bone.	36 - 130 U/L	81 U/L
Aspartate aminotransferase (AST) In range	An enzyme found in the liver, muscles and other tissues.	10 - 40 U/L	22 U/L

Reference intervals are not individualized treatment targets. Review results with your care team.

Health Panels Report

Jordan Mercer / Patient ID SYN-JM-742

Biomarker	About	Reference Range	Current Result
2026-10-04			
Basophils In range	The percentage of white blood cells reported as basophils.	0 - 2 %	0.6 %
Blood urea nitrogen In range	A protein-metabolism waste product measured in the blood.	7 - 25 mg/dL	15 mg/dL
BUN/Creatinine Ratio In range	Blood urea nitrogen divided by the serum creatinine result.	6 - 22 ratio	15.96 ratio
Calcium In range	An electrolyte involved in bone health, muscle function and nerve signaling.	8.6 - 10.3 mg/dL	9.4 mg/dL
Carbon dioxide In range	A metabolic-panel measure that largely reflects blood bicarbonate.	20 - 32 mmol/L	26 mmol/L
Chloride In range	An electrolyte involved in fluid and acid-base balance.	98 - 110 mmol/L	103 mmol/L
Cholesterol Total In range	The total amount of cholesterol circulating in the blood.	0 - 199 mg/dL	196 mg/dL
Cholesterol/HDL Ratio (calculated) In range	Total cholesterol divided by HDL cholesterol.	0 - 4.9 ratio	3.8 ratio
Creatinine In range	A muscle-metabolism waste product used when estimating kidney filtration.	0.6 - 1.29 mg/dL	0.94 mg/dL
Eosinophils In range	The percentage of white blood cells reported as eosinophils.	0 - 8 %	3 %

Reference intervals are not individualized treatment targets. Review results with your care team.

Health Panels Report

Jordan Mercer / Patient ID SYN-JM-742

Biomarker	About	Reference Range	Current Result
2026-10-04			
Estimated Glomerular Filtration Rate (eGFR) In range	Estimated kidney filtration using the CKD-EPI 2021 creatinine equation.	60 - 250 mL/min/1.73 m2	104 mL/min/1.73 m2
Globulin (calculated) In range	Total protein minus albumin.	1.9 - 3.7 g/dL	2.7 g/dL
HDL Cholesterol In range	Cholesterol carried by high-density lipoprotein particles.	40 - 999 mg/dL	52 mg/dL
Hematocrit In range	The percentage of blood volume occupied by red blood cells.	38.5 - 50 %	44 %
Hemoglobin In range	The oxygen-carrying protein concentration in the blood.	13.2 - 17.1 g/dL	14.8 g/dL
hsCRP In range	High-sensitivity C-reactive protein, a marker of inflammation.	0 - 3 mg/L	0.8 mg/L
Insulin In range	Fasting serum insulin, interpreted alongside glucose and clinical context.	0 - 18.4 uIU/mL	10.2 uIU/mL
LDL/HDL Ratio (calculated) In range	Calculated LDL cholesterol divided by HDL cholesterol.	0 - 4.9 ratio	2.3 ratio
Lp(a) In range	A largely inherited lipoprotein marker used alongside other cardiovascular risk measures.	0 - 74 nmol/L	28 nmol/L
Lymphocytes In range	The percentage of white blood cells reported as lymphocytes.	15 - 49 %	33 %

Reference intervals are not individualized treatment targets. Review results with your care team.

Health Panels Report

Jordan Mercer / Patient ID SYN-JM-742

Biomarker	About	Reference Range	Current Result
2026-10-04			
Mean Corpuscular Hemoglobin (MCH) In range	The average amount of hemoglobin in each red blood cell.	27 - 33 pg	30.2 pg
Mean Corpuscular Hemoglobin Concentration (MCHC) In range	The average hemoglobin concentration within red blood cells.	32 - 36 g/dL	33.6 g/dL
Mean Corpuscular Volume (MCV) In range	The average volume of a red blood cell.	80 - 100 fL	89.8 fL
Mean Platelet Volume (MPV) In range	The average size of platelets in the sample.	7.5 - 12.5 fL	10.2 fL
Monocytes In range	The percentage of white blood cells reported as monocytes.	0 - 13 %	7 %
Neutrophils In range	The percentage of white blood cells reported as neutrophils.	38 - 80 %	56.4 %
Platelet Count In range	The number of platelets, which contribute to blood clotting.	140 - 400 K/mcL	262 K/mcL
Potassium In range	An electrolyte involved in muscle, nerve and heart function.	3.5 - 5.3 mmol/L	4.3 mmol/L
Red Blood Cell Count (RBC) In range	The number of circulating red blood cells.	4.2 - 5.8 M/mcL	4.9 M/mcL
Red Cell Distribution Width (RDW) In range	The variation in red blood cell size.	11 - 15 %	12.8 %

Reference intervals are not individualized treatment targets. Review results with your care team.

Health Panels Report

Jordan Mercer / Patient ID SYN-JM-742

Biomarker	About	Reference Range	Current Result 2026-10-04
Sodium In range	An electrolyte involved in hydration and fluid balance.	135 - 146 mmol/L	140 mmol/L
Thyroid-stimulating Hormone (TSH) In range New marker	Serum TSH, a thyroid-regulation marker. First result recorded.	0.45 - 4.5 uIU/mL	2.14 uIU/mL
Total Bilirubin In range	A breakdown product of red blood cells processed by the liver.	0.2 - 1.2 mg/dL	0.6 mg/dL
Total protein In range	The combined concentration of albumin and globulin proteins in the blood.	6.1 - 8.1 g/dL	7.2 g/dL
Triglycerides In range	A circulating blood fat measured as part of the lipid profile.	0 - 149 mg/dL	135 mg/dL
Urine Albumin/Creatinine Ratio (UACR) In range New marker	Albumin-to-creatinine ratio from a random spot urine sample. First result recorded.	0 - 29 mg/g creatinine	14.8 mg/g creatinine
Vitamin B12 In range New marker	Serum vitamin B12. First result recorded in this health history.	232 - 1245 pg/mL	418 pg/mL
Vitamin D, 25-Hydroxy In range New marker	Serum 25-hydroxyvitamin D. First result recorded in this health history.	20 - 100 ng/mL	33.8 ng/mL
White Blood Cell Count (WBC) In range	The total number of circulating white blood cells.	3.8 - 10.8 K/mcL	5.7 K/mcL
